Product short description:

The Double-Sided LED Emergency Lighting Sign is a practical and effective way of indicating exits, directions or the location of toilets, etc...

Fitted with a 3.6V 800mAh Ni-Cd battery with a life of up to 3 hours. The LED Emergency Signage Kit has an LED light bracket that offers great energy savings and excellent performance. The lighting on this LED Emergency Lighting Sign allows you to use both sides of the sign independently thanks to the LED light distribution of the design.
Its innovative design makes for easy installation, with 4 types of installation possible: hanging, recessed, wall-mounted in side mode and wall-mounted in front mode. You can choose the signage (exit, right orientation, left orientation, up orientation, down orientation and WC).

Without a doubt, theLED Emergency Lighting Sign we offer on our online lighting site is a key element of any emergency lighting system.

* Permanent lighting.
