

# Flicker rectifier for Led ribbon 220/240VAC - 215VDC

**Product price:**

**€16.30 tax included**

**Product codes:**

Reference: LM0015

EAN13: 8435579700150

UPC: -

## **Product short description:**

The advantages of an LED ribbon anti-flicker rectifier are as follows:

**Improved visibility:** The anti-flicker rectifier eliminates flicker and variations in brightness, making the LED ribbon more visible and pleasant to look at.

**Reduced eye fatigue:** Flicker can cause eye fatigue, particularly with prolonged use. The anti-flicker rectifier can help reduce eye fatigue and improve visual comfort.

**Longer life:** Flicker can accelerate wear on LEDs, reducing their life. The anti-flicker rectifier can help extend LED life.

The flicker rectifier works by converting alternating current (AC) into direct current (DC). Direct current is more stable than alternating current, eliminating flicker and variations in brightness.

- Dimensions (L x W x H): 133 x 35 x 32 mm
- Voltage: 230V 50/60HZ
- IP67 protection
