Product short description:

The luminaire is sold without a bulb.

Detector	Dimensions:
No	See description

The Coupar series by Danish design duo Says Who presents a modern take on the traditional lantern. With its clean lines and soft, rounded design expression, the series naturally combines classic features with a modern, contemporary look. The perforated diffuser creates a pleasant glow while projecting an interesting play of light. Made from durable powder-coated metal. Easy in-ground installation with the base unit Nordlux.
