- The precision of Front Single's clean, simple and well-designed form blends equally well with modern and classic architecture. Front Single is the result of the exciting possibilities that arise when the luminaire is cast in aluminium and the designer, Sebastian Holmbäck, wishes to create beautiful, discreet and balanced outdoor lighting. Front has an organic and uncluttered design expression that is perfect for both classic and modern homes. The luminaire is made from cast aluminium in a soft sand colour that blends naturally with the architecture of the house. It can also be placed above a bathroom mirror for practical, elegant lighting.
