Detector	Dimensions:	
No	See description	

"Fold a sheet of paper, place a light bulb behind it and you have a lamp Although it's not quite that simple, designer Henrik Bønnelycke wants it to look that way. The shape of Fold is pure, which highlights the few carefully chosen details and the latest LED technology. The magnetic shade makes for easy installation and a sleek design, with no visible screws. The light is diffused upwards and downwards, and the four light patterns supplied with the lamp allow you to change the lighting to suit your wishes and style, while also allowing you to dim the light as required. The Fold wall light in copper is both decorative and sculptural. It is suitable for both indoors and outdoors.

This product is part of our " Designed For Seaside " range (suitable for coastal areas), made from highly durable materials to withstand the harshest coastal weather conditions.

Over time, exposure to wind and weather gives copper a beautiful darker patina.
