Product short description:

The Natural Textile Electrical Cable is the perfect cable to give a touch of personality to the lamp or socket of your choice.

The cable consists of a 20 mm² sheath covered with a hemp fabric. The sheath consists of two copper wires, each with a cross-section of 0.75 mm².

Its use is limited to indoor spaces. It can be connected in any room of the house or premises as it is manufactured to withstand voltages of between 220 and 240V AC and to operate in ambient temperatures of between -10ºC and 50ºC approx.

* Cable diameter: 8mm.

* Product manufactured to your specifications, and therefore exempt from the right of withdrawal.
