Product short description:

The luminaire is sold without a bulb.

Sigma lamps are designed to support original design ideas. The specific rectangular design is distinguished by a wavy decoration that gives it a unique character. It's worth focusing on the elegant lamps that emit light upwards and downwards. With their help, you can effectively illuminate the surface of the wall or take care of the lighting arrangements for works of art. The lamps are available in a universal colour palette that will suit any interior.
