Product short description:

Digital daily/weekly clock with LCD display ideal for swimming pool treatment plants, irrigation, etc.

Ready for DIN rail installation, it has a 230V AC power supply, 16 A / 250V AC switching capacity, maximum recommended load of 2000W, minimum interval of 1 minute and open contact (NO).

It supports up to 16 different programmes per day or week with a maximum of 18 steps per programme and pulses from 1 minute to 1 hour. It counts down from 100 minutes and has a 15-day reserve and a connection cable capacity of up to 2.5 mm².

Complies with international standards EN / IEC60730-1 and CE & RoHS certificates.

*** Caution: When using for the first time, you must press the "RESET" button to switch the display on.**
